Each year, Bryn Mawr College participates in the Higher Education Research and Development (HERD) Survey facilitated by the NSF. The HERD survey is the primary source of information on research and development expenditures at U.S college and universities. More information on the HERD survey can be found here: <https://nces.nsf.gov/surveys/higher-education-research-development/2022>

To more accurately represent the types of research conducted here at Bryn Mawr College, we are asking you to help us categorize your own research. Please select the most appropriate descriptor of the research you conduct from the options below.

Basic Research - experimental or theoretical work undertaken primarily to acquire new knowledge of the underlying foundations of phenomena and observable facts, without any particular application or use in view

Applied Research - original investigation undertaken in order to acquire new knowledge. It is directed primarily towards a specific, practice aim or objective

Experimental Research - systematic work, drawing on knowledge gained from research and practical experience and producing additional knowledge, which is directed to producing new products or processes or to improving existing products or processes.

The aforementioned Researcher hereby certifies that the salaries and wages charged to the above sponsored project as direct charges, and to residual, F&A cost or other categories are reasonable and accurate in relation to work performed

Supervisor (Primary Investigator or Provost) attests that the the above information is accurate.
